

Strategic IT Assessment

Every good road map needs a point of origin. You know that your technology goals need to support your business strategy. You may even have a pretty good idea of where you need to be. But understanding where you are now and how to finish the journey is the tough part. We can help. Salient CRGT's technology experts offer focused analysis and advice to help you pinpoint your current position and map your path to success.

The Service Offering

Selecting the best strategy for growth is a challenge for every company. Our Strategic Planning Analysis involves all areas of your organization. By incorporating business users, technical staff, and management into the process, we are able to offer you a comprehensive assessment and recommendation that goes beyond staying ahead of the technology curve. Our customizable analysis includes:

- ▶ Reviewing your business plan and strategy to ensure that IT goals support the vision of the organization.
- ▶ Conducting an operational review to identify pain points and assess how technology could further improve efficiency.
- ▶ Examining your technology infrastructure to determine strengths and weaknesses of current systems.
- ▶ Presenting findings, options, and recommendations to your organization.
- ▶ Assisting in the development of a tactical plan.
- ▶ Providing support for the implementation of the tactical plan.

The Benefits

At the end of the Strategic Planning Analysis, your company is furnished with a customized Analysis and Recommendations document. We identify your company's position today, and map the road for future growth. Our experience in this area has shown that:

- ▶ Synchronizing technical, operational, and management goals will allow you to position your IT organization as an enabler to success and growth.
- ▶ Utilizing a documented and measurable plan will allow you to move your IT organization forward while clearly demonstrating a robust ROI.
- ▶ Engaging an objective and knowledgeable third party to assist in the assessment of your organization can help to remove barriers and increase buy-in throughout your enterprise.

The Value of Salient CRGT

Since 1992, our Commercial IT Services team has been successfully guiding companies in developing and executing plans for future growth. Our staff's combination of real world experience, technical proficiency, and business acumen uniquely positions us to provide exceptional value to our customers. Our seasoned resources offer you:

- ▶ Objective insight backed by in-depth knowledge of business operations and software.
- ▶ The ability to integrate industry best practices with realistic solutions.
- ▶ Proven experience in bridging the gap between business and technology.
