

Enterprise IT

Sustaining, enhancing, modernizing, and transforming mission essential solutions—Salient CRGT delivers. We align our IT best practices with our customers' goals and objectives to deliver end-to-end enterprise IT solutions. Salient CRGT takes the burden of managing the core IT infrastructure for our customers and allow our customers to focus on their business mission. We manage the infrastructure using the a proven structured framework to ensure the technology platforms for our customers are secure, efficient, available, and reliable.

Enabling our Defense Community

Salient CRGT's enterprise-class IT maintains hardware, software, and systems engineered and deployed to support a large organization's voice, visual, and data telecommunications requirements. While a contributing element, our enterprise IT encompasses the larger routine, administrative, and operational activities of the organization in its day-to-day operations. We know that success is defined in terms of availability, compatibility, reliability, scalability, performance, security, and flexibility to supporting our nation's critical networks. We deliver the most flexible, cost-effective enterprise IT services and expertise across the following areas:

- ▶ **Core Infrastructure Voice and Data Network Services:** Provision and maintain all voice and data networking components
- ▶ **Virtual Compute Services:** Deploy and maintain all components of virtual compute environments and automated patching of operating systems and supporting components
- ▶ **Enterprise Service Desk:** Field user requests for all IT related issues including: hardware, software, and connectivity
- ▶ **Cloud Services:** Manage and provision cloud based offerings
- ▶ **Application Development and Process Automation:** Develop and automate application processes across multiple software systems to integrate distributed systems
- ▶ **Network Infrastructure:** Designs, upgrades and sustainment to next generation technologies
- ▶ **Full lifecycle software development and software engineering:** SE&I CMMI, Agile Scrum
- ▶ **Cyber and Network Security:** Policies and solutions to support virtualized environments, vulnerability and risk assessments, validation, and certification

Salient CRGT offers an extensive range of enterprise information technology solutions and services customized to fit the agency-unique missions across government. Our experience with a diverse group of customers across a variety of agencies and departments enables us to provide the most advanced technical solutions using proven methodologies and best practices. Our highly skilled employees draw upon years of experience to help you craft the right solutions to meet our nation's future challenges.
