

VOYAGER

Victim Notification

*Automate the tedious process of gathering
and processing Victim Notification data*

 **SalientCRGT**

Intuitive. Efficient. Effective.

Complete Paper-based Victim Forms with a Smartphone or Tablet

Voyager Victim Notification – Provides Law Enforcement officials with the ability to complete traditionally paper-based Victim forms with a smartphone or tablet. The solution is intuitive, requires minimal user training making implementation as simple as possible. Completed forms are automatically routed to the Victim and other Law Enforcement stakeholders immediately on submission. Available on all mobile platforms our hosted solution requires no equipment at the agency beyond the smartphone. No separate server or associated charges for the agency.

Features:

- ▶ Any browser, any device
- ▶ Efficient workflow
- ▶ Auto complete content
- ▶ Configurable defaults
- ▶ Administrative console for configuration and data management
- ▶ Data validation
- ▶ Automated delivery to victim and LE stakeholders
- ▶ API for external system access to data
