Solutions Optimized to Respond to Today's IT Challenges

Salient CRGT's mission is to satisfy our customers on time, all of the time, at the lowest reasonable cost and the highest justifiable quality. When you work with Salient CRGT, your challenges will be met with the energy and expertise needed to create a positive impact on your mission, with:

- ▶ **Scalable and Timely Solutions.** At Salient CRGT, agility is not just about the way we work, it is also what our solutions deliver. Our proven ITIL-based methodology is used to design, build, and run highly scalable and secure solutions.
- ▶ **Leverage of Existing IT Investments.** Salient CRGT looks for smart ways to leverage investments. New technologies are chosen for current and emerging customer needs, based solely on their merits and suitability.
- ▶ **Exceptional Talent.** People are the key to our customers' satisfaction. We have outstanding developers, engineers, analysts, program managers, and other professionals—many of whom have been with us for over a decade.

Innovation Centers

Our innovation centers bring *forward leaning* expertise in today's hotbed of information technologies and constantly infuse them across our organization to enhance service offerings to our customers. They provide our teams with the tools, methodologies, best practices, lessons learned and training to drive both innovative business solutions and continuous process improvement enabling our customers to better achieve their business mission and value.

- ▶ **Data Analytics Innovation Center:** Frames questions and exposes data driven answers to challenging business questions; 'Proof to Impact' assessments open new possibilities for clients.
- ▶ **Digital Services Innovation Center:** Enables agency digital transformation by modernizing processes, technologies and application development tools and techniques to bring speed, measurable value and enhanced constituent experience.
- ▶ **ITSM Innovation Center:** Delivers best practices, innovation solutions and modern tools to enable IT organizations to deliver high quality services in today's complex hybrid technology environments.
- ▶ **Communities of Practice:** Institute best practices and subject matter expertise throughout our Business Units to deliver consistent, high quality services in agile, analytics, cloud, cyber security, DevOps, health IT, mobility and UI/UX.

Representative of Our Customers

Talent Acquisitions Center

Talent Acquisitions integrates proprietary processes, certified specialists, and dedicated facilities. It eliminates program risk and drives mission results by enabling us to determine, with absolute certainty, which of our people precisely meets our customers' requirements.

"We see the scale of projects increasing in size and scope across the government as there is greater adoption of technologies such as Agile, data analytics, and cyber security. As a larger company, we increase our ability to take on larger programs and complete them successfully."
